Open Letter of Endorsement

With the completion of its Core 5 programme in the Summer of 2012 the Mobile VCE will close.

Changes to the telecommunications industry, which the work of the Mobile VCE has helped to forge, call for a new approach to research in wireless communications. On the other hand, the recipe for industry and university collaboration that the Mobile VCE has developed over the past 15 years has proved to be a great success.

With these two points in mind, a number of industry and university members of the Mobile VCE have come together to consider how best to create a new vehicle for research which recognises the new telecommunication landscape and makes best use of the assets and ways of working developed by the Mobile VCE. This open initiative is chaired by Simon Fletcher and the group is working closely with the ICT KTN and EPSRC.

The Board of Directors of the Mobile VCE confirm that they support and completely endorse the objectives and work of this group. If you would like to get involved with this initiative, please contact Simon Fletcher:
